The Ramo-Wooldridge Corporation
Los Angeles 45, California

Gentlemen:

Reference is made to your Proposal CMCC Dec. No. 151X5.1142
concerning the modification of the video programming logic of
System 4 to eliminate all receiving channel priorities.

Reference proposal has been reviewed by Customer No. 1
and disapproved for incorporation into Contract No. A-101.

Very truly yours,

25X1

Contracting Officer

COPY 1 OF 3

Dear Dan:

This is a proposal in response to some discussions held recently with Jack I. concerning the modification of the video programming logic of System 4 to eliminate all receiving channel priorities. The programming logic as it was originally conceived, provided that Bands 8, 9 and 10 receiving equipments were to be given overriding priority in the use of video recording equipment, and the crystal-video receiving equipment was provided exclusive use of the video recorder as long as it received signal activity. Subsequently, this feature was modified so that crystal-video channels would be given priority consideration but could not demand exclusive use of the recorder. This modification consisted of a few wiring changes in the original logic only.

It now appears desirable, however, to delete all priority features associated with the Bands 8, 9 and 10 receiving equipment. This modification will affect the video programming equipment only and will require the modification and rework of the 9-3 board. The rework is so extensive that a new layout is required and new 9-3 boards will have to be constructed.

Should you approve this proposal program by 27 June 1958, this change can be incorporated into Serial No. 101 by installing the modified 9-3 boards into the 8-9 unit which is being prepared for field installation on Serial No. 101. Serial No. 102 can be modified here at the plant as part of its overall modification. Field modification kits can be prepared for Serial Nos. 103 and 104, and Serial No. 105 through 107 can be modified prior to delivery.

Sincerely,

Dean

STATEMENT OF WORK
MODIFICATION OF
SYSTEM 4 VIDEO PROGRAMMING LOGIC

The Contractor proposes to provide the necessary engineering, labor, facilities, and material to perform the following work

<u>Item</u>	<u>Description</u>
1	Modify System 4 video programming logic to eliminate all features which give Bands 8, 9 and 10 of the receiving equipment priority to the video recorder.
2	Incorporate into the additional 8-9 unit to be added to Serial No. 101, the modification described in Item 1.
3	Incorporate into the basic design of Serial No. 102, 105, 106 and 107 the modification described in Item 1.
4	Fabricate, test and deliver for installation on Serial Nos. 103 and 104, field modification kits incorporating the modification described in Item 1.

SECRET

DELIVERY SCHEDULE
MODIFICATION OF
SYSTEM 4 VIDEO PROGRAMMING LOGIC

Items in the Statement of Work shall be delivered in accordance with the following schedule based on the date of receipt of authorization to proceed:

<u>Item</u>	<u>Schedule</u>
1	Research and Development - Four (4) weeks
2	Incorporation into 8-9 Unit for Serial No. 101 - At no change to existing schedule
3	Incorporation into Serial Nos. 102, 105, 106 and 107 - At no change to existing schedule
4	Field Modification Kits for Serial No. 103 and 104 - Seven (7) weeks
